DRAFTING TO AVOID SYNTACTIC AMBIGUITIES
Paul Conway\(^1\) - 2 May 2012

1. When I studied law the lecturers did not teach us how to draft documents. Most of us just managed somehow - fortuitously as it turned out.

2. Now many law schools have courses on legal drafting\(^2\) - but they are largely superficial, and give almost no guidance on the most common problems confronting lawyers - the structure of written language.

3. There is little point in knowing all of the law, if one cannot write clearly and precisely. The converse is also the case.

4. Lawyers need to know:--
   (a) the law; and
   (b) how to write about the law.

Criticism of legal drafting

5. Criticism of legal drafting, and the difficulties of understanding poorly drafted documents, are commonplace.
   (a) Mr Francis Bennion, in his paper, Written Evidence to the Renton Committee, quotes King Edward VI writing in 1550:- 'I would wish that ... the superfluous and tedious statutes were brought into one sum together, and made more plain and short, to the intent that men might better understand them; which thing shall most help to advance the health of the Commonwealth.'\(^3\)
   (b) Samuel Pepys, in his diary entry for 25 April 1666, referred to the 'obscurity [of English law] through multitude of long statutes.'\(^4\)
   (c) Mr Arthur Symonds, in a letter in 1838 to the Right Honourable Charles Poulett Thomson, (the President of the Board of Trade), wrote:- 'The defects of our Statute Law may be summarised up, in the looseness and ambiguity of its language - in the

\(^1\) BA, LLM, PhD. This paper is an abridged version of Dr Conway's thesis accepted in 1999 by University of Technology, Sydney for the degree of Doctor of Philosophy. Dr Conway's email address is paulconway@tribeconway.com

\(^2\) In 2012 Sydney Law School offers The Legal Profession (40 hours of seminars; 6 credit points) to undergraduate law students. Part 4 suggests strategies to facilitate equality and effective communication in the delivery of legal services(http://sydney.edu.au/law/cstudent/undergrad/docs_pdfs/2012UG_UoS_descriptions.pdf: visited on 16 April 2012).

confusion resulting from want of arrangement - ...

(d) The House of Commons’ committee which in 1838 suggested improvements in style in statutes acknowledged that: ‘The two most obvious defects in the composition of our laws, are, - 1st, the diffuseness, looseness, and ambiguity of the language; and 2nd ...’.

(e) In Watson v. Lee Chief Justice Barwick observed (in a different context) that: ‘No inconvenience in government administration can, in my opinion, be allowed to displace adherence to the principle that a citizen should not be bound by a law the terms of which he has no means of knowing.’

Call for ‘plain language’

6. The call for ‘plain language’ is not recent.

(a) Chaucer’s Dreame in the 16th century refers to a story ‘which ye shalle here, in playne Englische’.

(b) In Shakespeare’s Much Ado about Nothing Benedick commented on Claudio: ‘he was wont to speak plain and to the purpose, like an honest man and a soldier, and now is he turn’d orthography; his words are a very fantastical banquet, just so many strange dishes.’

(c) Justice Hill in Commissioner of Taxation v. Cooling described sections 160M(6) and (7) Income Tax Assessment Act 1936 (Cwlth) in these terms: ‘While both subsections present difficulties of construction, the former is drafted with such obscurity that even those used to interpreting the utterances of the Delphic oracle

1979) 144 C.L.R. 374.

(1979) 144 C.L.R. 374, at 381.

(1990) 22 FCR 42.
might falter in seeking to elicit a sensible meaning from its terms.\textsuperscript{12}

(d) Mr Dennis Murphy, QC, in his submission made on 4 September 1992 for the New South Wales Parliamentary Counsel's Office, and made to the House of Representatives Standing Committee on Legal and Constitutional Affairs into Commonwealth Legislative and Legal Drafting, submitted that ‘... all legislation should be reasonably capable of being understood by the ordinary person of ordinary intelligence and having ordinary education.\textsuperscript{13}

Clear and precise language

7. The more comprehensive expression 'clear and precise language'\textsuperscript{14}, or 'language which is both clear and precise', is preferable to 'plain English' and to 'plain language'.

(a) In its report delivered in November 1992 the Hansard Society Commission recommended that:-'... draftsmen (sic) should always seek for clarity, simplicity and brevity in their drafting, but that certainty should be paramount.\textsuperscript{15}

(b) Justice Frankfurter had said in United States v. Monia:- 'The notion that because the words of a statute are plain, its meaning is also plain, is merely pernicious oversimplification. ... A statute, like other living organisms, derives significance and substance from its environment, from which it cannot be severed without being mutilated.\textsuperscript{16}

\textsuperscript{12} (1990) 22 FCR 42, at 61. The section provided:- 'A disposal of an asset that did not exist (either by itself or as part of another asset) before the disposal, but is created by the disposal, constitutes a disposal of the asset for the purposes of this Part, but the person who so disposes of the asset shall be deemed not to have paid or given any consideration, or incurred any costs or expenditure, referred to in paragraph 160ZH(1)(a), (b), (c) or (d), (2)(a), (b), (c) or (d) or (3)(a), (b), (c) or (d) in respect of the asset.'

\textsuperscript{13} D. Murphy Submission Submission by Mr Dennis Murphy QC, N.S.W. Parliamentary Counsel, to House of Representatives Standing Committee on Legal and Constitutional Affairs Into Commonwealth Legislative and Legal Drafting, 4 September 1992: Submission number 25 at 3, para. 9.2. Mr Murphy's principle modifies his earlier view in D. Murphy Plain English in Drafting Legislation and Regulations Paper presented to Plain Legal Language for Public Sector Administrators Conference, 29 July 1992, Parliament House, Sydney, Australia, at 3.

\textsuperscript{16} (1943) 317 U.S. 424 (Justice Frankfurter dissented).

\textsuperscript{17} (1943) 317 U.S. 424, at 431-432.
8. While simplicity, brevity and plain English are often by-products of clarity, a document in clear language is often longer than an obscure document\(^\text{18}\).

(a) ‘To purge language of its natural fuzziness calls for a process, not of simplification, but of elaboration. Vocabulary and syntax become strained and convoluted, until there is achieved something which almost ceases to be language and is better described as linguistic formulation, ...\(^\text{19}\).’

9. Australian parliaments have commenced to mandate the use of plain language by users of legislation; and have attempted to legislate in a clearer and more precise manner.

(a) In New South Wales instances include section 60F(2) Fair Trading Act 1987 (NSW) (‘The [lay-by] statement must ... be clearly legible, readily understandable and written in the English language. ...\(^\text{20}\); and section 179(1) Legal Profession Act 1987 (NSW)\(^\text{21}\) (‘A disclosure under this Division [in relation to a costs agreement] must be made in writing and be expressed in clear plain language’).

(b) Section 16 Industrial Relations Act 1993 (Cwlth)\(^\text{22}\) requires the Commission to ensure that its decisions and determinations are 'expressed in plain English; and ... structured in a way that is as easy to understand as the subject matter allows.'

(c) Local Government Act 1993 (NSW), Protection of the Environment Administration Act 1991 (NSW), and Social Security Act 1991 (Cwlth) are examples of the ‘new’ form of legible and ‘user-friendly’ legislation.

**Importance of structure of written language**

10. Because English is a word order language, the placement of words is important. Changing the word order changes the meaning. Compare:-

(a) Keep the home fires burning;

(b) Keep burning the home fires;

(c) Keep fires burning the home;

(d) Keep home the burning fires;

(e) Fires keep the home burning; and

(f) Fires keep burning the home.

---

\(^{18}\) J. Redish How to Draft More Understandable Legal Documents Document Design Centre, American Institutes for Research, Washington, USA, 1979, at 5.

\(^{20}\) Fair Trading Act 1987 (NSW) has been superseded by Australian Consumer Law (schedule 2 to Competition & Consumer Law 2010 (Cwlth)). Australian Consumer Law requires documents to be transparent (defined in section 2 as (i) expressed in reasonably plain language; and (ii) legible; and (iii) presented clearly.)

\(^{21}\) Substantially repeated in section 316(1) Legal Profession Act 2004 (NSW).

\(^{22}\) Substantially repeated in section 601(3) Fair Work Act 2009 (Cwlth).
11. The most disconcerting aspect of the plain language movement is its failure to consider the structure of written language.

(a) 'In seeking to achieve clarity of expression, those who have no more to recommend than short sentences, simple words, and readability formulas are offering a cracker in circumstances where a full gourmet feast is gleaming in the chef’s eye for those with the wit but to ask for the menu. To practise their craft competently, legal drafters must gain control of the relevant intellectual skills. One such skill is facility in using some of the elementary techniques and knowledge of modern logic to achieve structure that is clear.\(^{23}\)

(b) Until the significance of sentence structure is recognised, clear and precise drafting is fortuitous and not routine.

12. Drafters must recognise the possibility of syntactic ambiguities occurring through inadvertence or incompetence (or both); and must avoid inadvertently including such ambiguities in text.

13. Excepting semantic ambiguities inherent in language, mathematical precision can be achieved in legal drafting.

14. Drafters with a comprehension of basic logic, and the ability to recognise (and avoid) unintended syntactic ambiguity, can construct lengthy sentences which are nevertheless clear and precise.

**Syntactic ambiguity differs from semantic ambiguity**

15. Syntactic ambiguity differs from semantic ambiguity.

(a) In Moore v. Hubbard\(^ {24}\) both semantic and syntactic issues arose.

(b) Hubbard placed a placard on an electric-light post.

(c) Section 5(10) Police Offences Act, 1928 (Vic.) made it an offence to place a placard on "any house or building or any wall fence lamp post or gate ...".

(d) Justice Macfarlane declared that: "This is a matter which is not free from doubt, but in my opinion the real question is whether the two words "lamp post" in the section are to be read as referring to two separate things, namely, a lamp and a post, or to one thing only, namely, a lamp-post.\(^ {25}\)

(e) The Judge concluded that 'lamp post' was 'to be read as one word, namely,
"lamp-post", and hence the conviction was quashed.

16. Mr Stephen Kloepfer says of semantic ambiguity that ‘a word’s inherent multiplicities of meaning derive from lexicographical usage and exist independently of context.’

17. Semantic ambiguity is the type of uncertainty of meaning resulting from the use of a multiple-meaning word.

(a) This form of ambiguity was recognised in Blood-Smyth v. Carter when the Full Court of the Supreme Court of New South Wales jointly stated: ‘... we think that, when a word commonly used in popular speech, whose legal connotation varies greatly according to the context and circumstances, is found in many different contexts in a patchwork statute such as the Landlord and Tenant (Amendment) Act, any attempt to give it the same meaning wherever it occurs may well lead to error.’

(b) Similarly the House of Lords has accepted that context can determine meaning.

18. Courts accept that language is imperfect, and regularly struggle with the determination of the meaning of words.

(a) In Towne v. Eisner Justice Holmes delivered the judgment of the Supreme Court of the United States that ‘income’ in an income tax law did not necessarily have the same meaning when used in the Constitution.

(b) His Honour whimsically said:-

‘A word is not a crystal, transparent and unchanged; it is the skin of a living thought and may vary greatly in colour and content according to the circumstances and the time in which it is used.’

19. Quite curious consequences follow from the attempts of the Courts to resolve semantic ambiguities.

(a) Mr Zechariah Chafee Jnr. gives an extreme example of misinterpretation of a multiple-meaning word.

(i) A Massachusetts doctor charged with procuring an abortion failed to convince the Supreme Judicial Court of Massachusetts that he was protected by the

26 (1935) V.L.R. 95, at 95.

30 For example, Tophams Ltd v. Sefton [1967] 1 A.C. 50.

31 (1918) 245 U.S. 418.

32 (1918) 245 U.S. 418, at 425.

33 Z. Chafee Jnr. The Disorderly Conduct of Words (1941) 41 Colum. L. Rev. 381.
Statute of Frauds. The doctor argued that no one should be held liable for the
debt, default, or miscarriage of another unless evidenced by some
memorandum in writing. 34

20. The potential plurality of the meaning of individual words is readily acknowledged.
(a) Lord Reid in the House of Lords has said:- ‘A provision is not ambiguous merely
because it contains a word which in different contexts is capable of different meanings
... A provision is, in my judgment, ambiguous only if it contains a word or phrase which
in that particular context is capable of having more than one meaning. 35

Syntactic ambiguity

21. The more prevalent (and usually less noticeable) kind of ambiguity is syntactic ambiguity.
22. The logical import of a statement is often determined by the close interaction of the words and
the syntax; syntactic ambiguity can easily produce ambiguity of meaning for the entire
sentence.
23. Syntactic ambiguity arises not from the range of meanings of single words, but from the
location of the words in sentences (and often from the interpretation of the structural words
expressing relationships between the semantic words). 36
24. It is the sentence structure which makes the text equivocal: not the multiplicity of the
meanings attributed to the words.
25. The meaning of a sentence is derived from the conjunction of the words in the sentence; but
doubts may arise as to the relationship between different words in a sentence. 37
26. Professor Layman E. Allen 38 has elegantly distinguished semantic ambiguity and syntactic
ambiguity as being the distinction between:-
(a) how the intended meaning of a statement is affected by the intended meaning of the
individual words used in that statement; and
(b) how the intended meaning of the statement is affected by the relationship intended

America from 1966-2006. From 1958-1966 Professor Allen was associated with Yale
Law School.
between the individual words used39.

27. In written material 'ambiguity' is narrower than 'uncertainty'.
   (a) 'Uncertainty' represents anything written in a sentence which allows that sentence to
       be interpreted in more than one sense.
   (b) 'Vagueness' is semantic ambiguity in the boundaries of reference of words.

28. The one word often connotes a large number of differing concepts.
   (a) Does 'penalty' include each of:
       (i) fine,
       (ii) forfeiture; and
       (iii) imprisonment40?
   (b) The range of possible classes of 'penalty' may be unlimited.
   (c) '[A]mbiguity ... is not to be equated with difficulty of construction, even difficulty to a
       point where judicial opinion as to meaning has differed.41'

29. Ambiguity is uncertainty among specific alternatives.

30. A word in context can mean more than the isolated word; and can also mean less than the
    isolated word - more, because in context the word acquires new context and, at the same
    time, less, because the word is delimited by that context.42

31. Although the words of a document are normally to be construed in their ordinary and natural
    meaning43, the words should be construed in their context as part of the document as a whole,
    rather than in either their strict etymological sense or their popular meaning apart from that
    context44.

32. The maxim 'noscitur a sociis45' expresses the notion that a word may be construed by

40 See section 21(1) Interpretation Act 1987 (N.S.W.); and sections 360(6), 431(3), 440AA(1) and 555 Crimes Act 1900 (N.S.W.).

43 Edrich's Case (1603) 5 Co. Rep. 118a, at 118b; 77 E.R. 238, at 239.

45 A thing is known by its companions.
R v. Casement

33. In R v. Casement Sir Roger Casement was charged with high treason contrary to Treason Act, 1351 (Eng.).

34. It was alleged that during World War I he incited British subjects who were prisoners of war in Germany to renounce their allegiance to the King.

35. The statute declared that treason was committed:
   ‘... if a man do levy war against our Lord the King in his realm, or be adherent to the King's enemies in his realm, giving to them aid and comfort in the realm, or elsewhere, and thereof be properly attainted of open deed by the people of their condition: ...’

36. The charge alleged adhering to the King's enemies elsewhere than in the King's realm, namely in the empire of Germany.

37. The defence unsuccessfully submitted that the Crown had failed to prove an offence in law.
   (a) 'The contention is that those words "or elsewhere" govern only the words "aid and comfort in the realm" and have no application to the words "be adherent to the King's enemies in his realm".

38. The competing interpretations were:-
   1. [treason was committed ...] if a man ...
      (a) be adherent to the King's enemies in his realm
      (b) giving to them aid and comfort in the realm, or elsewhere, ...
   2. [treason was committed ...] if a man ...
      (a) be adherent to the King's enemies in his realm,
      (b) giving to them aid and comfort in the realm,
      or elsewhere, ...

39. The King's Bench Division, and on appeal the Court of Criminal Appeal, whilst acknowledging the careful, well reasoned and able arguments of the defence, found the offence proved.

40. The Chief Justice, Lord Reading, at first instance said:-
   ‘... in my judgment the words "giving to them aid and comfort" may be read as a parenthesis; yet I do not confine the application of the words "or elsewhere" to that parenthesis; I think they apply just as much to the parenthesis as to the words which precede it. My view is ... that the words "or elsewhere" govern both limbs of the sentence - both the adhering to the King’s enemies and the aid and comfort to the

---

46 Scales v. Pickering (1828) 4 Bing. 448; 130 E.R. 840. Lord Diplock in Letang v. Cooper [1965] 1 Q.B. 232, at 247 warned: 'The maxim noscitur a sociis is always a treacherous one unless you know the societas to which the socii belong.'

47 [1917] 1 K.B. 98.

48 25 Edw. 3, stat. 5, c. 2.

49 [1917] 1 K.B. 98, at 122.
King's enemies - and that it is an offence to adhere within the realm or without the realm to the King's enemies, and it is equally an offence to adhere within the realm to the King's enemies by giving them aid and comfort without the realm.\textsuperscript{50}

41. On appeal to the Court of Criminal Appeal, the unanimous Court dismissed the prisoner's appeal saying:

'We think that the meaning of these words in this: "giving aid and comfort to the King's enemies" are words in apposition; they are words to explain what is meant by being adherent to, and we think that if a man be adherent to the King's enemies in his realm by giving to them aid or comfort in his realm, or if he be adherent to the King's enemies elsewhere, that is by giving them aid or comfort elsewhere, he is equally adherent to the King's enemies; and if he is adherent to the King's enemies, then he commits the treason which the statute of Edward III defines.\textsuperscript{51}

42. In Town Investments Limited v. Department of the Environment\textsuperscript{52} Lord Diplock commented that: 'My Lords, it has been said that Roger Casement was hanged by a comma ...'.\textsuperscript{53}

**Bourne (Inspector of Taxes) v. Norwich Crematorium Ltd**

43. In Bourne (Inspector of Taxes) v. Norwich Crematorium Ltd\textsuperscript{54} the taxpayer had claimed an income taxation deduction for expenditure in the construction of a crematorium's furnace chamber and chimney tower.

(a) Income Tax Act, 1952 (Eng.) allowed a deduction if the building was in use 'for the purpose of a trade which consists in the ... subjection of goods or materials to any process.'

(b) Disallowing the claim on the ground that the consumption by fire of the dead body of a human being was not the subjection of goods or material to any process (and this despite 'goods and materials', 'subjection' and 'process' being words of the widest import), Justice Stamp said:-

'English words derive colour from those which surround them. Sentences are not mere collections of words to be taken out of the sentence, defined separately by reference to the dictionary or decided cases, and then put back again into the sentence with the meaning which you have assigned to them as separate words, so as to give the sentence or phrase a meaning which as

\textsuperscript{50} [1917] 1 K.B. 98, at 129: that is, interpretation 2.

\textsuperscript{51} [1917] 1 K.B. 98, at 137. In The Trial of Earl Russell [1901] A.C. 446 a divorce followed by a second marriage in Nevada, United States of America had been held to be a breach of section 57 of the Offences against the Person Act, 1861 (Eng.) even though occurring beyond the King's dominions.

\textsuperscript{52} [1978] A.C. 359.

\textsuperscript{54} [1967] 2 All E.R. 576, 44 T.C. 164.
a sentence or phrase it cannot bear without distortion of the English language.\textsuperscript{55}

Constitution of United States of America

44. Even the Constitution of United States of America contains syntactic ambiguities. Consider the following examples.

45. Art. 1, §3, cl. 3

No Person shall be a Senator who shall not have attained to the Age of thirty years, and been nine Years a Citizen of the United States, and who shall not, when elected, be an Inhabitant of that State for which he (sic) shall be chosen.

(a) Is the second 'and' to be read conjunctively or disjunctively? If the proper construction is that 'and' is conjunctive, then a person must fulfil all three qualifications\textsuperscript{56} before being allowed to sit in the Senate.

(b) If the proper construction is disjunctive\textsuperscript{57}, then a nine year old Tibetan who has been in the United States for five days can be a senator, so long as the person is an inhabitant of that liberal State from which the person was elected\textsuperscript{58}.

(c) There is nothing in the text\textsuperscript{59} which excludes such an interpretation.

(d) The peculiar interpretation can be avoided simply by reformatting the text into paragraphs, and taking care to specify that the candidate must satisfy each of the three conditions.

46. Art. 1, §8, cl. 1

The Congress shall have Power to lay and collect Taxes, Duties, Imposts and Excises, to pay the Debts and provide for the common Defence and general Welfare of the United States; but all Duties, Imposts and Excises shall be uniform throughout the United States.

(a) The problem is whether the 'common defence and general welfare' clause:-

\begin{itemize}
  \item (a) attain to the age of thirty years; and
  \item (b) been nine years a citizen of United States; and
  \item (c) at the time of election be an inhabitant of the State for which he shall be chosen.
\end{itemize}

Under this interpretation the only disqualification to election is a combination of:-
\begin{itemize}
  \item (a) not being an inhabitant of the State; with either
  \item (b) not being thirty years old; or
  \item (c) not being nine years a citizen.
\end{itemize}

The extreme illustration (as well as the general comments) are given by John Hart Ely in The Limits of Logic: Syntactic Ambiguity in Article One of the U.S. Constitution 1963 S.M.U.L.L. 117.

The disjunctive interpretation is logically possible: but one cannot imagine that a court would propound such a fanciful interpretation.
(i) is a grant to Congress of a general unrestricted power to legislate for the common defence and general welfare of the United States [that is, unrelated to laws which also deal with taxes, duties, imposts and excises]; or
(ii) simply limits the purposes for which Congress can tax [that is, the laws must also deal with taxes, duties, imposts and excises].

(b) The Supreme Court of the United States accepted alternative (b). However the independent power construction is equally compelling.

Courts rarely recognise syntactic ambiguities

47. Courts rarely recognise syntactic ambiguities. Invariably the judicial response is to interpret a clause in a particular way - and without compelling argument.

48. The arbitrary preference of one interpretation over another has no justification - and invariably generates criticism.

Calbeck v. Travelers Insurance Co

49. The United States Supreme Court's interpretation in Calbeck v. Travelers Insurance Co. of section 3(a) Longshoremen’s and Harbor Workers' Compensation Act 1927 (USA) provoked vigorous opposition.

50. The statute provided:-

Compensation shall be payable under this chapter in respect of disability or death of an employee, but only if the disability or death results from an injury occurring upon the navigable waters of the United States (including any dry dock) and if recovery for the disability or death through workmen's compensation proceedings may not validly by provided by State law.

51. The United States Supreme Court, by a majority, interpreted the provision as authorising the payment of federal compensation to two maritime workers where state compensation was also available.

52. The opposition of the two dissenting justices was particularly damning.

63 (1962) 370 U.S. 114.
'... The Court concludes that Congress did not really mean what it said. I cannot join in this exercise in judicial legerdemain. I think the statute still means what it says, and what it has always been thought to mean - namely, that there can be no recovery under the Act in cases where the State may constitutionally confer a workmen's compensation remedy. While the result reached today may be a desirable one it is simply not what the law provides.\(^{64}\)

53. By using the following abbreviations the statutory provision can be reduced to 'compensation, but only if navigable and if not recovery'.

(a) **compensation** 'compensation shall be payable under this chapter in respect of disability or death of an employee';

(b) **navigable** 'the disability or death results from an injury occurring upon the navigable waters of the United States (including any dry dock)'; and

(c) **not recovery** 'recovery for the disability or death through workmen's compensation proceedings may not validly be provided by State law.\(^{65}\)

54. The competing syntactical constructions are:-

A1 **compensation**, but only if [**navigable** and if not **recovery**]; and

B1 [**compensation**, but only if **navigable**] and [**compensation** if not recovery].

55. Construction A1 is logically equivalent to:-

A2 if **navigable** and if not **recovery**, then **compensation**

which is logically equivalent to:-

A3 if [**navigable** and **not recovery**], then **compensation**.

56. Construction B1 is logically equivalent to:-

B2 [if **navigable**, then **compensation**] and [if not **recovery** then **compensation**]

which is logically equivalent to:-

B3 if [**navigable** and **not recovery**], then **compensation**.

57. From construction B2 one can deduce\(^{66}\) each of:-

B4 if **navigable**, then **compensation**; and

B5 if not **recovery**, then **compensation**.

58. (a) To justify compensation under construction A1 there are two necessary requirements:- both

   (i) **navigable**; and

   (ii) **not recovery**.

(b) If either component is absent, then compensation is not payable.

59. To justify compensation under construction B1 there is only one necessary requirement:- either

\(^{64}\) (1962) 370 U.S. 114, at 132 (Justices Stewart and Harlan concurring).

\(^{66}\) Simplification.
(i) navigable; or
(ii) not recovery.

60. The United States Supreme Court chose construction B1:-

"Our conclusion is that Congress invoked its constitutional power so as to provide compensation for all injuries sustained on navigable waters whether or not a particular injury might also have been within the constitutional reach of a State workmen's compensation law."  

61. The conditional statement, 'IF a, THEN b', is more often than not really a disguised bi-conditional statement, 'IF AND ONLY IF a, THEN b'.

(a) The legislature specifies the exclusive antecedent conditions entitling compensation: in other words, 'IF a, THEN b'; AND IF NOT-a, THEN NOT-b'.

(b) This is another way of saying 'IF a, THEN b', BUT OTHERWISE, NOT'. If the antecedent condition [a] is not satisfied, then the conclusion [b] is not the case.

Professor Layman E. Allen

62. Professor Layman E. Allen has developed a methodology to reveal the logical character of syntactically ambiguous propositions.

63. Professor Allen devised a procedure which he maintains will help in the systematic detection of unintended syntactic ambiguity. As further developed, Professor Allen states that his technique will encourage more accurate and understandable legal drafting.

64. In Logic, Law and Dreams Professor Allen submits that:-

"It is a partial interpretation only because it is concerned merely with ascertaining the logical relationship between the constituent elements of the entire rule and not

67 This follows from interpretations B4 and B5.

68 (1962) 370 U.S. 114, at 117 (Justices Stewart and Harlan dissenting).

69 Words in upper case are defined terms within Professor Allen's LEGAL RELATIONS language. However Professor Allen does not use 'NOT': he uses 'NEG' as a defined term for 'it is NOT so that ...'.

concerned with ascertaining the range of meaning of the individual constituents. Another way of characterizing this, perhaps, is to describe it as being concerned with syntactical interpretation ..., but not concerned with semantic interpretation.\textsuperscript{73}

**Normalized (sic) drafting**

65. Professor Allen regards his system of normalized (sic)\textsuperscript{74} drafting as the natural progression from his arrow diagrams (or picture diagrams\textsuperscript{75}), and as the solution to the evils of inadvertent ambiguous drafting.

66. Horizontal form diagrams illustrate the natural-language statements in a simplistic methodology. Inevitably this highlights the structural ambiguities in the natural-language statements.

67. Horizontal form diagrams can:-
   (a) contain abbreviations (such as letters) to replace relevant parts of the natural-language statements, the abbreviations being joined by straight lines representing the language connectors; OR
   (b) contain within rectangular boxes the text of the natural-language statements, the boxes being joined by straight lines representing the language connectors.

68. Professor Allen’s systematically organised methodology for transforming natural-language statements into a more understandable (and less syntactically ambiguous) form highlights the logical relationships between the constituent elements of natural-language statements.

69. There are five principal steps:-
   (a) separate the natural-language statements into their constituent elements;
   (b) determine whether:-
      (I) conditional statements; OR
      (ii) bi-conditional statements
      are more likely to have been intended by the natural-language statements;
   (c) determine which parts of the constituent elements of the natural-language statements represent :-
      (I) the conditions of the natural-language statements; AND

\textsuperscript{73} (1957) 52 L. Libr. J. 131, at 139.

\textsuperscript{74} A legal rule is fully normalized by expressing both its between-sentence and within-sentence logical structure by means of defined structural terms and indicating the relationships intended between its sentences and sentence parts. (L.E. Allen & C.S. Saxon Exploring Computer Aided Generation of Questions for Normalizing Legal Rules Paper presented at Second Annual Conference on Law & Technology at University of Houston Law School, June 24 28, 1985, in C. Walter (ed.) Computing Power and Legal Language: The Use of Computational Linguistics, Artificial Intelligence, and Expert Systems in the Law Quorum Books, New York, 1988, at 251.) This paper adopts the American spelling of ‘normalized’ when the word is quoted, and otherwise uses the English spelling, ‘normalised’.

(ii) the consequences of the natural-language statements;

(d) re-arrange the constituent elements into the form of:-

(I) conditional statements; OR
(ii) bi-conditional statements; AND

(e) rewrite the natural-language statements:-

(I) in a horizontal form diagram; AND
(ii) then in an arrow diagram; AND
(iii) then, using the arrow diagram for assistance, in clear normalized form.

70. The clear normalized form must express the same set of ideas (with minimum wording change, but not necessarily using the same set of words) as the natural-language statements.

71. The logical connectors 'AND', 'OR', 'IF ... THEN', 'IF, AND ONLY IF' and 'NOT' join parts of the natural-language statements.

72. Professor Allen summarises the perceived advantages of clear normalized forms of statutes as follows:-

If statutes were drafted in normalized form, legislators considering their adoption would be able more knowledgeably to select at the time of enactment the particular syntactic interpretation that expressed their intention. Normalization gives legislators a precise tool to state legal norms by unambiguously relating conditions to desired results. Yet, any desired flexibility can still be achieved by incorporating uncertainty into the semantic content of sentences through the individual words and phrases chosen. ...

Another advantage of normalized statutes is that such statutes are easier to comprehend and use than their traditional prose counterparts. ...

73. Illustrations 1-3 are horizontal form diagrammatic representations of natural-language statements.

(a) Portions of the statements are presented in boxes, which are connected by lines to highlight the connectors 'and' and 'or'.

(b) Alternative available versions of the natural-language statements are presented.

74. Illustration 4 is an arrow diagram representation of natural-language statements.

(a) The methodology largely mirrors that in illustration 1.

(b) However the text is presented either in a conditional format, or in a bi-conditional format.

75. Illustration 1

Cockerill v. William Cory & Son Limited

(a) Regulation 45 of Docks Regulations, 1934 (Eng.) provides as follows:-

No person shall ... remove ... any fencing, gangway, gear, ladder, hatchcovering ... or other thing whatsoever required by these regulations to be provided. If removed, such things shall be restored at the end of the period during which their removal was necessary ...

(b) The plaintiff's husband died when he fell through an open hatchway on the defendant's steamship.

(c) The incident allegedly resulted from a breach of regulation 45, the hatch cover not having been restored after the completion of loading.

(d) 'On a consideration of reg. 45, the question arises whether the words "required by these regulations to be provided" govern all that had gone before or whether they govern only the words "other thing whatsoever". It is argued on behalf of the plaintiff that the latter is the correct construction. On that basis it is said that in the present case hatch coverings were removed, and it is said that in breach of the requirement in the second sentence of reg. 45, the hatch covers were not restored. It is said, therefore, that the defendants were in breach of the regulation.'

(e) There are two competing constructions.

Interpretation 1

No person shall ... remove ... any.

Interpretation 2

No person shall ... remove ... any.

At first instance

Justice McNair gave judgment for the defendants, and held 'that only the words "other things whatsoever" are qualified by the succeeding words "required by these regulations to be provided"', and the previously enumerated items of equipment - fencing, gangway, gear, and so forth - are left completely unqualified.' Justice McNair had based himself largely on the dictum of Lord du Parcq in Grant v. Sun Shipping Co. Limited. 81

80 Namely interpretation 2.

In Grant v. Sun Shipping Co. Limited a stevedore was injured when he fell into a ship's hold, as hatch coverings had been temporarily removed but not replaced. The House of Lords found for the worker, predominantly because there was a breach of regulation 37. However in relation to regulation 45, Lord du Parcq said: 'The question was raised in argument whether the words "required by these regulations to be provided" in reg. 45, were to be read as qualifying only the words "other things whatsoever\(^2\) " or as qualifying all the preceding substantives\(^3\) ... I have no doubt that the former construction is correct. No other seems to me to be possible with due regard to the context.'

Lord Uthwatt agreed with the reasoning and conclusions of Lord du Parcq\(^4\).

The Court of Appeal in Cockerill v. William Cory & Son Limited\(^5\) unanimously accepted interpretation 1, and rejected the obiter conclusion of Lord de Parcq.

Lord Justice Willmer said: 'But for the contrary view expressed by Lord du Parcq I should, without hesitation, have said that that was the plain and ordinary meaning of the words used. I should have thought that the phrase "other things" in the first sentence was to be construed as ejusdem genus\(^6\) with the specifically enumerated items previously referred to, the genus being those things which are "required by these regulations to be provided." That this view is correct I should have thought, reinforced by the use of the words "such things" in the second sentence.\(^7\) The Judge then concluded: '... I prefer to construe regulation 45 in accordance with what I conceive to be the ordinary and natural meaning of the words used, and to hold that the words "required by these regulations to be provided" are related to and qualify all the items of equipment previously enumerated.\(^8\)

76. Illustration 2

Wexler v. Playle\(^9\)

(a) Section 2 Valuation for Rating Act, 1953 (Eng.) provides as follows:-

... the gross value for rating purposes of a hereditament ... [is] ... an amount equal to the rent ... at which the hereditament ... might reasonably have been

\(^2\) Namely interpretation 2.

\(^3\) Namely interpretation 1.

\(^4\) [1948] A.C. 549, at 555-556.

\(^5\) [1959] 2 Q.B. 194.

\(^6\) In other words, 'of the same kind'.

\(^7\) [1959] 2 Q.B. 194, at 208.

\(^8\) [1959] 2 Q.B. 194, at 210, namely interpretation 1.

expected ... to let ... if the landlord had undertaken to bear the cost of the repairs and insurance, and the other expenses, if any, necessary to maintain the hereditament in a state to command that rent.

(b) There are two competing constructions.

(c) Interpretation 1

(d) Interpretation 2

(e) Though unnecessary to decide in the case, Lord Justice Morris preferred interpretation 2\(^90\), whilst Lord Justices Willmer and Harman preferred the first construction\(^91\).

(f) Lord Justice Morris recognised the syntactic ambiguity. ‘Are we to read the concluding words as governing “cost of the repairs and insurance” or are we to read them as governing “the other expenses, if any, necessary to maintain the hereditament in a state to command that rent?” ... That seems to lend some support to the view that the concluding words of subsection (2) are words that relate to “the other expenses, if any, necessary” to maintain the hereditament in a state to command that rent.’\(^92\)

(g) Lord Justice Willmer (with whom Lord Justice Harman agreed) said:- ’... I should have thought that the more natural construction to put upon it is that the concluding words ...

are to be taken as governing only "the other expenses" which immediately precede them.\textsuperscript{93}

77. Illustration 3

Re Water-Tube Boilermakers' Association's Agreement\textsuperscript{94}

(a) Section 21(1) Restrictive Trade Practices Act, 1956 (Eng.) provides as follows:--

... a restriction ... shall be deemed to be contrary to the public interest unless the court is satisfied ...(f) that ... the removal of the restriction would be likely to cause a reduction in the volume or earnings of the export business which is substantial either in relation to the whole export business of the United Kingdom or in relation to the whole business (including export business) of the said trade or industry ....

(b) There are three possible constructions of the relevant portion of the statute - but only the first two were considered by the Court.

(c) Interpretation 1 'substantial' qualifies 'business'

\begin{center}
  \begin{tikzpicture}
    \node (a) {removal of the restriction would be likely to cause a reduction in the volume of the export business which is substantial ...};
    \node [above of=a, yshift=-2em] {removal of the restriction would be likely to cause a reduction in the};
    \node [below of=a, yshift=2em] {volume of the export business which is substantial ...};
  \end{tikzpicture}
\end{center}

(d) Interpretation 2 'substantial' qualifies 'reduction'\textsuperscript{95}

\begin{center}
  \begin{tikzpicture}
    \node (a) {removal of the restriction would be likely to cause a reduction in the volume of the export business which is substantial ...};
    \node [above of=a, yshift=-2em] {removal of the restriction would be likely to cause a reduction in the};
    \node [below of=a, yshift=2em] {volume of the export business which is substantial ...};
  \end{tikzpicture}
\end{center}

(e) Interpretation 3 'substantial' qualifies 'volume or earnings'

\begin{center}
  \begin{tikzpicture}
    \node (a) {removal of the restriction would be likely to cause a reduction in the volume of the export business which is substantial ...};
    \node [above of=a, yshift=-2em] {removal of the restriction would be likely to cause a reduction in the};
    \node [below of=a, yshift=2em] {volume of the export business which is substantial ...};
  \end{tikzpicture}
\end{center}

\textsuperscript{93}[1960] 1 Q.B. 217, at 239.

\textsuperscript{95}This interpretation requires a re-arrangement of the statutory text.
The Restrictive Practices Court adopted interpretation 2, holding that the statute required a substantial reduction in the whole business, even if it was a small export business. A small reduction in a substantial export business was not caught by the section.

Counsel for the Association\textsuperscript{96} relies on a strict grammatical construction of the paragraph. He says the word "which" naturally refers to the immediately antecedent noun "business". He submits further that, if counsel for the registrar's construction\textsuperscript{97} is correct, it should read "business which would be substantial" and not "is". While we recognise (sic) the force of counsel for the Association's argument based on the strict grammar of the paragraph, we do not think that it is the correct construction. We think that, without doing violence to the words of the paragraph, it can be read in the manner suggested by counsel for the registrar. We think that is what Parliament intended ... it seems reasonably clear that Parliament's mind is directed to a substantial reduction in exports.\textsuperscript{98}

78. **Section 5(a) Clayton Act, 1914\textsuperscript{99}**

A final judgment ... brought by or on behalf of the United States under the antitrust laws to the effect that a defendant has violated said laws shall be prima facie evidence against such defendant in any action ... under section 15a of this title ... provided, That this section shall not apply to consent judgments or decrees entered before any testimony has been taken ....

(a) There are four competing constructions of the proviso.

(i) **Interpretation 1**

\begin{figure}
\centering
\begin{tikzpicture}
\begin{scope}[nodes={draw,thick},node distance=2cm]
\node (consent) {consent};
\node (judgments) [right of=consent] {judgments};
\node (decrees) [below of=consent] {decrees};
\node (entered) [below of=decrees] {entered before any testimony has been taken};
\node (this) [right of=entered] {this section shall not apply};
\end{scope}
\begin{scope}[every path/.style={thick}]
\path (consent) edge (judgments);
\path (decrees) edge (entered);
\path (entered) edge (this);
\end{scope}
\end{tikzpicture}
\end{figure}

\textsuperscript{96} Counsel urged for interpretation 1.

\textsuperscript{97} Namely interpretation 2.

\textsuperscript{98} [1959] 3 All E.R. 257, at 275-276

(ii) Interpretation 2

consent judgments entered before any testimony has been taken

decrees

this section shall not apply

(iii) Interpretation 3

consent judgments entered before any testimony has been taken

decrees

this section shall not apply

(iv) Interpretation 4

consent judgments entered before any testimony has been taken

decrees

this section shall not apply

(b) Under the first and third interpretations section 5(a) would not apply to a consent judgment entered after the completion of evidence. Under the second interpretation section 5(a) would not apply to a decree entered on a motion for summary judgment. In all probability interpretation 4 is the most appropriate structural interpretation\(^\text{100}\).

\(^{100}\) Example given by R.H. Stern Syntactic Ambiguity in Clayton's Act, Section 5(a), 1960D M.U.L.L. 129.
A significant source of syntactic ambiguity is the ambiguous use of 'and' and 'or'. The principal difference between the words is that 'and' is usually conjunctive, whilst 'or' is usually disjunctive - but not always. Early English treatises on interpretation make it clear that the primary difference between 'and' and 'or' is not constant. An unknown author writing in about 1571 says that 'and' will be treated 'disjunctively' (that is, as meaning 'or') when '... twoo suche thinges so contraryant are coupled together that they can not drawe under one yoche.' Edmund Plowden in 1799 suggests that 'And in many cases words spoken in the copulative shall be taken in the disjunctive, if such sense be most strong against those that speak them' - that is, 'and' can be interpreted to mean 'or'.

In Marsden v. Reid the Chief Judge, Lord Ellenborough, when interpreting a marine insurance policy said:-

'I think that the voyage insured to Palermo, Messina, and Naples, meant a voyage to all or any of the places named; with this reserve only, that if the ship went to more than one place she must visit them in the order described in the policy.'

Having already held in Marsden v. Reid that 'and' could be interpreted to mean 'or', Lord Ellenborough, in Moorsom v. Page held that the use of 'or' made no difference. His Lordship held in Moorsom v. Page that an agreement to load 'a full and complete cargo, consisting of copper, tallow, and hides, or other goods...' was satisfied by a full load of tallow and hides.

'And' has sometimes been construed as disjunctive. In Associated Artists Limited v. Inland Revenue Commissioners the objects of a theatrical company included 'to present classical, artistic, cultural, and education dramatic works.' Justice Upjohn decided that the sub-clause was

---

101 A Discourse upon the Exposicion & Understandinge of Statutes with Sir Thomas Egerton's Additions edited by S.E. Thorne from manuscripts in the Huntington Library, San Marino, California, USA, 1942, at 138.

106 [1814] 4 Camp. 103; 171 E.R. 34.

107 [1814] 4 Camp. 103; 171 E.R. 34.

to be read disjunctively. The company could therefore present a classical play, an artistic play, a
cultural play or an educational play\(^\text{109}\) - and the first three categories need not be educational.

83. 'And' has of course also been construed to be conjunctive.

84. In Re Best\(^\text{110}\) a bequest to ‘charitable and benevolent institutions’ was held to mean institutions
which were both charitable and benevolent.

\[ 	ext{I see no reason for reading the conjunction “and” as “or”}.\] \(^\text{111}\)

85. On the other hand, in Re Eades\(^\text{112}\) a bequest to ‘religious, charitable, and philanthropic objects’
was held to mean that ‘religious objects, and charitable objects and philanthropic objects are
within the area of selection - but it is not necessary that any single object should have more than
one of these three characteristics’.\(^\text{113}\)

86. Justice Sargant recognised (but rejected) the alternative possible construction - that ‘all the
objects are to be both religious and charitable and philanthropic’.\(^\text{114}\)

87. In Traders Prudent Insurance Co. Limited v. The Registrar of the Workers Compensation
Commission of New South Wales\(^\text{115}\) the Commission sought to terminate an insurer’s licence on
grounds including a breach of section 30A (13A)(c) Workers Compensation Act, 1926 (NSW).

88. The section provided:

\[ 	ext{‘Every insurer shall promptly co-operate with the Committee and assist to carry out its}
duties under this section...’}. \]

89. The Commission argued that the section meant that there were two separate obligations:-

(a) \textbf{Interpretation 1}

\[ 
\begin{align*}
\text{Every insurer shall} & \quad \text{promptly co-operate with the Committee} \\
& \quad \text{assist to carry out its duties under this section ...}
\end{align*}
\]

\(^{115}\) [1971] 2 NSWLR 513.
(i) Interpretation 1 may be interpreted to mean either interpretation 1A or interpretation 1B:-

1. **Interpretation 1A**

   (a) Punctuated, paragraphed and tabulated, interpretation 1A is equivalent to interpretation 1A.1:-

   (i) **Interpretation 1A.1**

      Every insurer shall promptly:

      (a) co-operate with the Committee; AND

      (b) assist
to carry out its duties under this section ...

2. **Interpretation 1B**

   (b) Punctuated, paragraphed and tabulated, interpretation 1B is equivalent to:-

   (i) **Interpretation 1B.1**

      Every insurer shall:

      (a) promptly co-operate with the Committee; AND

      (b) assist
to carry out its duties under this section ...

90. The insurer submitted that the first sentence of the section does not impose two separate obligations but only one - namely, to co-operate promptly with the Committee and to assist it in carrying out its duties\(^{116}\).

   (a) **Interpretation 2**

      every insurer shall

   promptly co-operate with the Committee and assist to carry out its duties under this section ...

---

(i) Interpretation 2 may be interpreted to mean either interpretation 2A or interpretation 2B:-

(1) **Interpretation 2A**

```
    every insurer shall
          |    |        |    |
          |    |        |    |
          |    |        |    |
          |    |        |    |
          |    |        |    |
          |    |        |    |
    promptly
          |    |        |    |
          |    |        |    |
          |    |        |    |
          |    |        |    |
    co-operate with the Committee
          |    |        |    |
          |    |        |    |
          |    |        |    |
          |    |        |    |
    assist
          |    |        |    |
          |    |        |    |
          |    |        |    |
          |    |        |    |
    to carry out its duties under this section ...
```

(a) Punctuated, paragraphed and tabulated, interpretation 2A is equivalent to:-

(i) **Interpretation 2A.1**

Every insurer shall promptly:

(a) co-operate with the Committee; AND
(b) assist
to carry out its duties under this section ...

(2) **Interpretation 2B**

```
    every insurer shall
          |    |        |    |
          |    |        |    |
          |    |        |    |
          |    |        |    |
          |    |        |    |
          |    |        |    |
    promptly
          |    |        |    |
          |    |        |    |
          |    |        |    |
          |    |        |    |
    co-operate with the Committee
          |    |        |    |
          |    |        |    |
          |    |        |    |
          |    |        |    |
    assist
          |    |        |    |
          |    |        |    |
          |    |        |    |
          |    |        |    |
    to carry out its duties under this section ...
```

(a) Punctuated, paragraphed and tabulated, interpretation 2B is equivalent to:-

(i) **Interpretation 2B.1**

Every insurer shall:-

(a) promptly co-operate with the Committee; AND
(b) assist
to carry out its duties under this section ...

91. Justice Hope accepted the insurer’s submissions\(^{117}\), and said:-

*It has been submitted for the appellant that the first sentence of the paragraph does not impose two separate obligations on insurers, namely, to co-operate promptly with the Committee, and to assist it to carry out its duties, but one obligation, namely, to co-operate promptly with the Committee and to assist it in carrying out its duties. It is*

\(^{117}\) Interpretation 2
said that this language is, or is analogous to, what is known to the grammarians as a hendiadys. This word is defined in the Shorter Oxford English Dictionary to be a figure of speech in which a single idea is expressed by two words connected by a conjunction, and the example given is "law and heraldry" as meaning "heraldic law". I think that the construction placed upon the paragraph for the appellant is the correct one. I find it difficult to imagine that by the paragraph it was intended to impose on insurers an obligation to co-operate with the Committee without some indication of the matters in respect of which they were required to co-operate with that body. Despite the grammatical difficulties which are involved, I think that the area in respect of which it was intended to propose the obligation of prompt co-operation was the carrying out of the Committee's duties under s. 30A and under s. 6 of the Workers Compensation (Silicosis) Act, 1942-1946. So construed, the paragraph has a reasonably clear operation, and since this is a possible construction, and the paragraph is obviously designed to bring the conduct which it describes within the grounds upon which a licence may be terminated or suspended, I think it is proper that this more limited construction should be given to it than the wider one which was preferred by the Commission.

'Or' interpreted to mean 'and'

92. In Federal Steam Navigation Co Limited v. Department of Trade and Industry Lord Wilberforce, Lord Simon of Glaisdale, and Lord Salmon, in the House of Lords (with Lord Reid, and Lord Morris of Borth-y-Gest, dissenting) decided that 'or' should be interpreted to mean 'and' in section 1 of the Oil in Navigable Waters Act 1955 (Eng.). The section provided:- 'If any oil ... is discharged ... from a British ship ... the owner or master of the ship shall ... be guilty of an offence ...'. The Court upheld the convictions of both the owner and the master.

93. In R v. Oakes the Court will read "or" for "and" in Official Secrets Act, 1920 (Eng.).

94. The first criminal sentenced to death after Massachusetts changed its capital punishment from hanging to electrocution unsuccessfully argued to the Massachusetts Supreme Court in Storti v. Commonwealth that electrocution was 'cruel or unusual punishments' under the Massachusetts Constitution, and hence unconstitutional.

95. The court held that:- 'the word "unusual" must be construed with the word "cruel" and cannot be taken so broadly as to prohibit every humane improvement not previously known in

\footnotesize

118 Interpretation 2.

121 [1959] 2 Q.B. 350, at 357.

122 (1901) 178 Mass. 549.
Massachusetts.\textsuperscript{123} 'The court interpreted 'or' as 'and' so that death by electrocution was not unconstitutional (since it was not also cruel).

'Or' interpreted to mean 'either ... or ..., but not both'

96. In Monte Ulia v. Banco\textsuperscript{124} the Court of Appeal read 'or' in a statute as meaning 'either ... or ..., but not both'.

And/or

97. A further problem occurs in the use of the expression 'and/or'. Justice Abbott in In the Estate of Phoebe Playfair, Deceased\textsuperscript{125} described the text as a 'slipshod and blundering phrase\textsuperscript{126}', and considered 'the use of the phrase "and/or" as bad draftsmanship.\textsuperscript{127}'

98. In Cuthbert v. Cumming\textsuperscript{128} the Court considered a charterparty which required the plaintiff's ship '"... to receive and take on board from the defendant or his agents a full and complete cargo of sugar, molasses and/or other lawful produce ...' - that is to say:-

\[
\begin{array}{c}
\text{sugar} \\
, \\
\text{molasses} \\
, \\
\text{and/or} \\
\text{other lawful produce}
\end{array}
\]

99. The trial judge, Baron Martin, agreed with the shipowner that 'and/or' was conjunctive\textsuperscript{129} - that is:-

\[
\begin{array}{c}
\text{sugar} \\
\text{molasses} \\
\text{other lawful produce}
\end{array}
\]

100. Both appellate courts agreed with the shipper that the shipper satisfied his obligations by loading the ship with sugar and molasses (but not, for example, also cocoa) even though the ship was not thereby filled.

101. In the Court of Exchequer Baron Alderson said:- '"... according to the contract, the parties were either to load a full and complete cargo of sugar and molasses, and other lawful produce, or a full

\textsuperscript{123} (1901) 178 Mass. 549, at 553.
\textsuperscript{124} [1971] P. 137.
\textsuperscript{125} [1946] S.A.S.R. 110.
\textsuperscript{128} (1855) 24 L.J. Ex. 198; 156 E.R. 668.
\textsuperscript{129} (1855) 24 L.J. Ex. 198, at 200; 156 E.R. 668, at 671.
cargo of sugar and molasses, or a full cargo of other lawful produce, leaving it open in every way...

102. In the further appeal to the Court of Exchequer Chamber Justice Coleridge said:- 'According to the construction which we put upon the contract ... the merchant had his option of loading a cargo of sugar and molasses with or without the other things.' This is the equivalent of:-

103. Justice Cresswell commented briefly:- '... the merchant had the right to elect and furnish a cargo of sugar and molasses alone ... he had the right to elect, and to treat the contract as a contract to supply a cargo of sugar and molasses only.' This is the equivalent of:-

**Disjunctive relationship**

104. Even when the disjunctive relationship ('OR') is intended, nevertheless the meaning may be obscure.

---

130 (1855) 24 L.J. Ex. 198, at 199; 156 E.R. 668, at 670.
131 (1855) 24 L.J. Ex. 310, at 312.
132 (1855) 24 L.J. Ex. 310, at 312.
105. This is because there are two related, but distinguishable, types of disjunction - and the distinction is rarely appreciated.

106. The statement 'a or b' may be interpreted to mean either:-
(a) $a \lor b$ (but not both $a$ AND $b$). This is exclusive (or strong) disjunction; OR
(b) $(a \lor b)$ OR (both $a$ AND $b$). This is inclusive (or weak) disjunction.

107. The statement 'The door is open or [the door is] closed' is an example of exclusive disjunction - both alternatives (i.e. door open and door closed) cannot be true: one (unspecified) alternative is true, and the other is false.

108. When a mother yields to her child's request, and says:- 'Take a biscuit or [take] a piece of cake', the mother's statement is exclusive disjunction - she certainly does not want the child to have both a biscuit and cake.

109. On the other hand if the mother said to her child:- 'Would you like salt or [would you like] pepper with your meal?' the mother would hardly be disconcerted if the child had both - this is an instance of inclusive disjunction.

110. Latin was much neater than English.

111. Whereas English used the same word, 'or', to convey two separate concepts, Latin had two separate words corresponding to the two different senses of 'or'.

112. The Latin word, 'aut', indicated an absolute alternative (i.e. strong, or exclusive, disjunction: ($a \lor b$) AND NOT [both $a$ AND $b$]).

113. The Latin word, 'vel', connected alternatives which rested in choice (i.e. weak, or inclusive, disjunction: $(a \lor b)$ OR [both $a$ AND $b$]).

114. In both logic and mathematics, disjunction is usually taken to be in the inclusive form.

115. Where clarity and precision are essential, it is easy to avoid this form of syntactic ambiguity.
(a) If exclusive disjunction is intended, the drafter should write in the form '$(a \lor b)$ AND NOT (both $a$ AND $b$)'.
(b) If inclusive disjunction is intended, the drafter should write in the form '$(a \lor b)$ OR (both $a$ AND $b$)'.

Professor Layman Allen

116. Professor Layman Allen recommends an understanding of modern symbolic logic to reveal the precise issues, to enable the issues to be formulated in relatively precise and unambiguous terms, and to mark the limits within which a situation is open for judicial choice and discretion 133.

Understand logic

117. Professor Allen correctly submits that an understanding of logic increases one's sensitivity to the tricky nature of English prose 134.

Neither formal logic nor symbolic logic is a wonder-device capable of solving every difficulty in interpretation. However complexities in language are often revealed through an understanding of logic.

Logic will better clarify the issues, and will show the implications of making a particular choice - but logic will not supply criteria for making the selection between alternatives - whether semantic or syntactic.

At its lowest level, lawyers and drafters must understand each of the syntax forms:-
(a) 'AND';
(b) 'OR';
(c) 'NOT';
(d) 'IF ... THEN ...'; and
(e) 'IF, AND ONLY IF, ... THEN ...'.

An understanding of each of 'because' and 'unless' is also helpful.

'And' is usually the logical replacement for 'also', 'although', 'but', 'furthermore', 'however', and 'moreover'.

'And' is usually the logical meaning of the comma, and of the semicolon, in a sentence when used to separate distinct things or concepts.

Usually conditions connected by 'and' must each be fulfilled to produce the consequence stated in the particular legal rule.

'And' is used as a connector:-
(a) within sentences; AND
(b) between sentences (that is to say, as a shorthand method of joining two separate sentences sharing common features).

Between-sentence structural terms relate complete sentences to other complete sentences. Within-sentence structural terms relate sentence-parts to either other sentence-parts or to complete sentences.

Professor Layman Allen recommends using:-
(a) 'AND,' as the within-sentence connector; and

---

(b) ‘AND₂’ as the between-sentence connector.¹³⁷

128. On this analysis:-

(a) the sentence ‘Michael wants bread and butter’ when meaning ‘Michael wants [bread and butter]’ would be written as ‘Michael wants bread AND₁ butter’; and

(b) when the drafter seeks to mean ‘[Michael wants bread] and [Michael wants butter]’ the drafter writes ‘Michael wants bread AND₂ butter’.

129. Until uniformity in language is achieved, ‘and’ should be expressly stated to be conjunctive, and not disjunctive.

130. If conjunction is intended, the text should be in one of the following forms:-

(a) ‘jointly a AND₂ b’; or

(b) ‘both a AND₂ b’.

131. If the statement ‘a and b’ expresses a conjunction, the statement is true when both a and b are true, but not otherwise.

132. This does not impinge on the relational meaning of ‘and’.

(a) The statement ‘person-p₁ and person-p₂ are twins’ asserts a relationship between person-p₁ and person-p₂: the relationship is equivalent to the statement ‘person-p₁ is a sibling of person-p₂, AND₂ person-p₂ is a sibling of person-p₁’.

OR

133. ‘Or’ usually connotes a disjunctive relationship - but the word is often used conjunctively.

134. Logically, disjunction requires at least one condition of the statement to apply, whether or not the other condition applies.

135. Satisfying one or more of the conditions connected by ‘or’ is sufficient to produce the consequence stated in the particular legal rule.¹³⁸

136. This is the Latin ‘vel’ (inclusive [or weak or non-exclusive] disjunction), rather than the Latin ‘aut’ (exclusive [or strong] disjunction).

137. Until uniformity in language is achieved, and until it is universally agreed that ‘or’ is inclusively disjunctive, the text should expressly state the intended meaning.

Inclusive disjunction

138. If inclusive disjunction is intended, write any of:-

1. (1) a; OR₂
   (2) b; OR₂
   (3) both:–

¹³⁷ Correspondence between Professor Allen and the author in October and November 1997.

¹³⁸ AND₂ in Professor Allen’s terminology.

139. If the statement 'a or b' expresses an inclusive disjunction, it is true when at least one component (either a or b) [or more than one component] is true, but not otherwise.

Exclusive disjunction

140. If exclusive disjunction is intended, write any of:-

4. (1) a; OR₂
   (2) b; AND₁
   NOT both:-
   (l) a; AND₁
   (ii) b

5. either:-
   (1) a; OR₂
   (2) b;
   AND₁ NOT both:-
   (l) a; AND₁
   (ii) b

6. only one of:-
   (1) a; AND₂
   (2) b;
   AND₁ NOT both:-
   (l) a; AND₁
   (ii) b

141. If the statement 'a or b' expresses an exclusive disjunction, it is true when one only component (either a or b; but not both) is true, but not otherwise.

142. 'Or' is used as a connector:-
   (a) within sentences; AND₂

---

¹⁴⁰ 'But NOT [both a AND₁, b]' is not really necessary because of 'only one'.
(b) *between* sentences (that is to say, as a shorthand method of joining two (or more) separate sentences sharing common features).

143. Professor Layman Allen recommends using 'OR,' as the within-sentence connector, and 'OR,' as the between-sentence connector\(^{141}\).

144. On this analysis the natural-language sentence 'Michael wants bread or butter':-
   (a) when meaning 'Michael wants [bread or butter]' would be written as 'Michael wants bread OR, butter'; and
   (b) when meaning '[Michael wants bread] or [Michael wants butter]' would be written as 'Michael wants bread OR, butter'.

**NOT**

145. 'Not' is the logical equivalent of expressions such as:-
   (a) 'it is not the case that';
   (b) 'it is not so that';
   (c) 'it is false that'; and
   (d) 'it is not true that'.

146. 'NOT' denies a proposition.

147. The proposition, 'NOT-\(a\)', is true when \(a\) is false, but NOT OTHERWISE'. When \(a\) is true, the negation of \(a\) is false.

**IF A, THEN B**

148. 'If \(a\), then \(b\)' usually expresses a conditional (or hypothetical) statement.

149. The conditions which follow "IF" are sufficient to produce the consequence stated in the particular legal rule\(^{142}\).

150. The expression usually has the same meaning as:-
   (a) '\(a\) implies \(b\)';
   (b) '\(a\), only IF \(b\)',
   (c) 'IF \(a, b\)',
   (d) 'in case \(a, b\)',
   (e) 'should \(a, b\)',
   (f) 'whenever \(a, b\)',
   (g) 'a is a sufficient condition for \(b\)',
   (h) '\(b\) is implied by \(a\)',
   (i) '\(b\), IF \(a\)',
   (j) '\(b\), only IF \(a\)', and

\(^{141}\) Correspondence between Professor Allen and the author in October 1997.

151. The statement is false only when \( a \) is true, and \( b \) is false.

152. The statement is true when both \( a \) and \( b \) are true; and the statement is sometimes true and sometimes false when \( a \) is false.

153. The truth of \( b \) can be inferred from the truth of \( a \); and the truth of \( a \) is logically relevant to, and necessary for, the truth of \( b \).

154. Drafters must understand that:
   (a) 'IF \( a \), THEN \( b \)' is not logically equivalent to 'IF \( b \), THEN \( a \)'; and
   (b) '\( a \) is a necessary condition for \( b \)' is logically equivalent to 'IF \( a \), THEN \( b \)'.

155. 'IF \( a \), THEN \( b \)' simply states that \( a \) is one (of possibly many) causes of \( b \). It does not propound that \( a \) is the only cause of \( b \); it leaves open the possibility that \( b \) may result from a cause other than \( a \).

156. Sometimes the conditional natural-language statement, 'IF \( a \), THEN \( b \)', is more appropriately interpreted as '((IF \( a \), THEN \( b \)) AND \( c \))': in other words, something more is being stated when the antecedent of the conditional statement is not satisfied. This is the interpretation which Professor Layman Allen categorises as 'IF \( a \) THEN \( b \), BUT OTHERWISE, \( c \)'.

157. Sometimes the conditional natural-language statement appears in the form 'IF \( a \), THEN \( b \)', and (if not-\( a \), then not-\( b \)) - or this form is the most appropriate structural interpretation of the natural-language statement.
   (a) This is a particular instance of '((IF \( a \), THEN \( b \)) AND (IF NOT-\( a \), THEN \( c \)))': 'NOT-\( b \)' is used instead of \( c \).
   (b) This is the interpretation which Professor Layman Allen categorises as 'IF \( a \), THEN \( b \), BUT OTHERWISE, NOT': and it is logically equivalent to the bi-conditional 'IF, AND ONLY IF, \( a \), THEN \( b \)'.

---

143 Often 'provided that' and 'provided however" are used to indicate conjunction.

Drafters must be careful if $b$ is a conjunction of two or more statements, for example:- 'IF $a$, THEN $[x \text{ AND } y]$\textsuperscript{145}; and IF NOT-$a$, THEN NOT-$[x \text{ AND } y]$'.

(a) This is not the same as 'IF $a$, THEN $[x \text{ AND } y]$, BUT OTHERWISE, NOT$'.

(b) By De Morgan's Rules 'IF $a$, THEN $[x \text{ AND } y]$, AND IF NOT-$a$, THEN NOT-[x \text{ AND } y]$ is the same as 'IF $a$, THEN $[x \text{ AND } y]$, AND IF NOT $a$, THEN NOT $[\text{ NOT } x \text{ OR NOT } y]$'.

**IF AND ONLY IF**

159. (a) 'If and only if $a$, then $b$'; and

(b) ' $a$ is a necessary and sufficient condition for $b$' each express an equivalence relationship between $a$ and $b$. $a$ and $b$ are logically equivalent statements.

160. The conditions which follow "IF" are necessary and sufficient to produce the consequence stated in the particular legal rule\textsuperscript{147}.

161. The bi-conditional expressing the material equivalence between $a$ and $b$ is a tautology. The statement is true when both $a$ and $b$ are true; it is false when either (but not both) $a$ or $b$ is false; and it is sometimes true and sometimes false when both $a$ and $b$ are false.

162. 'IF AND ONLY IF $a$, THEN $b$' is significantly different from 'IF $a$, THEN $b$'.

(a) From 'IF AND ONLY IF $a$, THEN $b$' one can deduce each of:-

(i) 'IF $a$, THEN $b$'; and

(ii) 'IF $b$, THEN $a$'.

(b) From 'IF $a$, THEN $b$' nothing can be deduced.

163. (a) The more common erroneous conclusion is to argue:-

(i) 'IF $a$, THEN $b$;

(ii) NOT-$a$;

(iii) therefore NOT-$b$.

(b) Such an argument is clearly fallacious.

(i) This is demonstrated by considering the argument:-

(1) 'IF person-p1 is in Sydney, THEN person-p1 is in Australia;

(2) person-p1 is NOT in Sydney;

(3) therefore person-p1 is NOT in Australia'\textsuperscript{148}.

\textsuperscript{145} The brackets are necessary to avoid the interpretation: 'IF $a$, THEN $x$ AND $y$'.

\textsuperscript{146} Note the disjunction. Using the format for BUT OTHERWISE, NOT, one would have [wrongly] assumed the interpretation, 'IF $a$, THEN $[x \text{ AND } y]$, AND IF NOT $a$ THEN [NOT $x \text{ AND NOT } y]$'. Often the drafter wants an interpretation with a conjunction, and not with a disjunction. The BUT OTHERWISE, NOT format is unsatisfactory in this case.

\textsuperscript{148} Suppose person-p1 was in Melbourne: person-p1 would still be in Australia.
164. Drafters rarely use the format 'IF AND ONLY IF 𝑎, THEN 𝑏' - even when the drafter intends '𝑎 is a necessary and sufficient condition for 𝑏'.

165. Drafters invariably seek to establish what conditions are sufficient to reach a specific conclusion: this is the format 'IF 𝑎, THEN 𝑏'.

166. The difficulty arises when one does not have fact 𝑎, but nevertheless seeks (fallaciously) to conclude 𝑏.

167. In a document, the concept 'if fact 𝑎 is established, then legal consequence 𝑏 follows' is correctly interpreted to mean that the drafter has stated only one of the possible factual antecedents [𝑎] which implies the legal consequence [𝑏]; facts other than 𝑎 might also result in 𝑏, but the document is silent on such consequences.

168. Professor Layman Allen correctly suggests that courts often apply the maxim 'expressio unius est exclusio alterius'; and hold that by explicitly stating what antecedent [𝑎] implies the consequence [𝑏], the drafter intends that 𝑏 will follow ONLY when 𝑎 is established.\(^{149}\)

169. In other words, the implication 'IF 𝑎, THEN 𝑏' is incorrectly converted by interpretation into the co-implication 'IF AND ONLY IF 𝑎, THEN 𝑏'.

BECAUSE

170. 'Because' used in the format of '𝑎 because 𝑏' is usually interpreted to mean one of:-

1. (i) 𝑎; AND
   (ii) 𝑏

2. (i) 𝑏; AND
   (ii) IF 𝑏, THEN 𝑎

3. (i) 𝑏; AND
   (ii) IF 𝑏, THEN 𝑎; AND
   (iii) 𝑎

171. The three interpretations might result in any of the following senses:-

   (a) 𝑎 from 𝑏 by virtue of logical inference, that is, determined by a specified logical system;
   (b) 𝑎 from 𝑏 by virtue of Mother Nature, that is, determined by the laws of nature;
   (c) 𝑎 from 𝑏 by virtue of a legal decision, that is, determined by the operation of the legal system; and
   (d) 𝑎 from 𝑏 by virtue of a combination of one or more of the three preceding paragraphs.

UNLESS

172. 'Unless' is a troublesome connector.

173. It often appears as '𝑎 unless 𝑏'.

174. The connector can be used to mean any one of:-

1 'IF NOT-b, THEN a' (in the sense of logical implication: a single IF-THEN interpretation); and
2 '(a) IF NOT-b, THEN a; AND
   (b) IF b, THEN NOT-a) (in the sense of a special material implication - but not the usual material implication of equivalence, 'IF AND ONLY IF b, THEN a'). This is a double IF-THEN interpretation, and is identified by Professor Layman Allen's 'IF ... THEN ..., BUT OTHERWISE, NOT'. Interpretation 2 is logically deducible from interpretation 1, and says more than interpretation 1;
3 'and' (in the sense of logical conjunction - that is:- 'a AND NOT-b'); and the context rarely determines which use is intended. Professor Layman Allen in Language, Law and Logic: Plain Legal Drafting for the Electronic Age convincingly illustrates 4,128 different categories of meaning of 'unless' (jointly with other ambiguous connecting words).

Understanding logical relationships helps to avoid common errors

(a) a, if b is usually interpreted to mean:-
    IF b, THEN a
(b) a, only if b is usually interpreted to mean:-
    IF a, THEN b
(c) b, even though a is usually interpreted to mean:-
    IF [a OR, if NOT a], THEN b
(d) given that a, b is usually interpreted to mean:-
    IF a, THEN b
(e) a implies b is usually interpreted to mean:-
    IF a, THEN b
(f) if a, b is usually interpreted to mean:-
    IF a, THEN b
(g) in case a, then b is usually interpreted to mean:-
    IF a, THEN b
(h) subject to a, b is usually interpreted to mean:-
    IF a, THEN b

Simplification.

The interpretation is the same as 'whether or not'.
(i) should $a, b$ is usually interpreted to mean:-
    IF $a$, THEN $b$

(j) when $a, b$ is usually interpreted to mean:-
    IF $a$, THEN $b$

(k) whenever $a, b$ is usually interpreted to mean:-
    IF $a$, THEN $b$

(l) where $a, b$ is usually interpreted to mean:-
    IF $a$, THEN $b$

(m) whether or not $a, b$ is usually interpreted to mean:-
    IF $[a \lor \neg a]$, THEN $b$\(^{153}\)

(n) $a$ is a sufficient condition for $b$ is usually interpreted to mean:-
    IF $a$, THEN $b$

(o) $b$ is implied by $a$ is usually interpreted to mean:-
    IF $a$, THEN $b$

(p) $b$ if $a$ is usually interpreted to mean:-
    IF $a$, THEN $b$

(q) $b$, provided that $a$ is usually interpreted to mean:-
    IF $a$, THEN $b$

Sometimes the connector is interpreted as a conjunction:-
    $a \land \neg a$.

(r) $a$, if and only if, $b$ is usually interpreted to mean:-
    $a$ is equivalent to $b$

Fixed logical relationships

176. There are fixed logical relationships between propositions (regardless of the truth or falseness of the propositions).

177. Arguments or inferences based on propositions are either valid or invalid - that is, the arguments either follow logically and the conclusion is derived from the premises, or they do not.

\(^{153}\) "Whether or not' has a preclusive role. The consequence, $b$, is unconditional, and each of $a$ and NOT-$a$ are excluded as possible implied conditions for $b$. The most acceptable interpretation is an unconditional statement: $a \land \neg a$ are excluded as conditions for $b$. Professor Allen calls the 'whether or not' provision the 'outlaw' clause, and says:-'Insofar as it is possible to do so, including an outlaw clause rules out the likelihood that the conditions "outlawed" by it will be decided to be implied conditions for the rest of the norm.' (L.E. Allen Towards a Normalized Language to Clarify the Structure of Legal Discourse Paper presented at International Conference on Logic, Informatics, Law at Florence, Italy, 6-10 April 1981, in A.A. Marino, A.A. (ed.) Deontic Logic, Computational Linguistics and Legal Information Systems: Edited Versions of Selected Papers from the International Conference on "Logic, Informatics, Law" Florence, Italy, April 1981 North-Holland Publishing Company, Amsterdam, The Netherlands, 1982, 349, at 396.)
Rules of inference

There are 9 elementary valid argument forms (or rules of inference), the validity of which can be established by logical truth tables.

1. **Modus ponens**
   
   IF $a$, THEN $b$
   
   $a$
   
   Therefore, $b$

2. **Modus tollens**
   
   IF $a$, THEN $b$
   
   NOT-$b$
   
   Therefore, NOT-$a$

3. **Hypothetical syllogism**
   
   IF $a$, THEN $b$
   
   IF $b$, THEN $c$
   
   Therefore, IF $a$, THEN $c$

4. **Disjunctive syllogism**
   
   $a$ OR $b$
   
   NOT-$a$
   
   Therefore, $b$

5. **Constructive dilemma**
   
   [IF $a$, THEN $b$] AND [IF $c$, THEN $d$]
   
   $a$ OR $c$
   
   Therefore, $b$ OR $d$

6. **Destructive dilemma**
   
   [IF $a$, THEN $b$] AND [IF $c$, THEN $d$]
   
   NOT-$b$ OR NOT-$d$
   
   Therefore, NOT-$a$ OR NOT-$c$

7. **Simplification**
   
   $a$ AND $b$
   
   Therefore, $a$

8. **Conjunction**
   
   $a$
   
   $b$
   
   Therefore, $a$ AND $b$

---

Logical truth tables provide an effective method to determine the validity or invalidity of an argument. The concept is discussed in most texts on symbolic logic, such as I.M. Copi Symbolic Logic 5th ed. Macmillan Publishing Company Inc., New York, USA, 1979.
9. **Addition**
   
   \[ a \]
   
   Therefore, \( a \) OR \( b \)

**Rules of replacement**

10. **De Morgan's Rules**\(^1\)
    
    NOT-[\( a \) AND \( b \)] is equivalent to [NOT-\( a \) OR NOT-\( b \)]
    
    NOT-[\( a \) OR \( b \)] is equivalent to [NOT-\( a \) AND NOT-\( b \)]

11. **Commutation**
    
    [\( a \) OR \( b \)] is equivalent to [\( b \) OR \( a \)]
    
    [\( a \) AND \( b \)] is equivalent to [\( b \) AND \( a \)]

12. **Association**
    
    [\( a \) OR (\( b \) OR \( c \))] is equivalent to [(\( a \) OR \( b \)) OR \( c \)]
    
    [\( a \) AND (\( b \) AND \( c \))] is equivalent to [(\( a \) AND \( b \)) AND \( c \)]

13. **Distribution**
    
    [\( a \) AND (\( b \) OR \( c \))] is equivalent to [(\( a \) AND \( b \)) OR (\( a \) AND \( c \))] 
    
    [\( a \) OR (\( b \) AND \( c \))] is equivalent to [(\( a \) OR \( b \)) AND (\( a \) OR \( c \))]

14. **Double negation**
    
    \( a \) is equivalent to [NOT NOT-\( a \)]

15. **Transportation**
    
    [IF \( a \), THEN \( b \)] is equivalent to [IF NOT-\( b \), THEN NOT-\( a \)]

16. **Material implication**
    
    [IF \( a \), THEN \( b \)] is equivalent to [NOT-\( a \) OR \( b \)]\(^2\)

17. **Material equivalence**
    
    \( a \) is equivalent to \( b \) is equivalent to [(IF \( a \), THEN \( b \)) AND (IF \( b \), THEN \( a \))]
    
    \( a \) is equivalent to \( b \) is equivalent to [(\( a \) AND \( b \)) OR (NOT-\( a \) AND NOT-\( b \))]

18. **Exportation**
    
    [(IF \( a \) AND \( b \)), THEN \( c \)] is equivalent to [IF \( a \), THEN (IF \( b \), THEN \( c \))]

19. **Tautology**
    
    \( a \) is equivalent to [\( a \) OR \( a \)]
    
    \( a \) is equivalent to [\( a \) AND \( a \)]

---

\(^2\) The logical convention is that 'NOT' qualifies only the proposition which follows the connector 'NOT'. 'NOT \( a \) OR \( b \)' is interpreted as 'either [the denial of \( a \)] OR \( b \)'. If both propositions (that is, each of \( a \) AND \( b \)) are intended to be denied in that form of proposition, then the rules of logic require brackets to be used, that is, 'NOT [\( a \) OR \( b \)]'. Sometimes the proposition is written using a hyphen as 'NOT-[\( a \) OR \( b \)]'.

Page 42 of 51
180. Drafting is not a game of words, with umpires enforcing technical rules to trap the unwary and make hapless players look foolish. It is a vital part of the system of administering justice. The system aims to produce just and predictable outcomes\(^{157}\). Language being the process of use and change, it is unlikely that semantic ambiguity can ever be eradicated\(^{158}\). It is the unintentional syntactic uncertainties which must be avoided.

\(^{158}\) The inherent deficiencies of language will also mean that documents will continue to be imprecise: S. Kloepfer Ambiguity and Vagueness in the Criminal Law: an Analysis of Types (1984-85) 27 Crim. L.Q. 94.
Conclusions

181. Draft using:-
   (a) indentation AND paragraph numbering (for layout clarity); AND
   (b) a subscript on the language connectors, 'AND', and 'OR', for interpretative clarity.

182. Drafters should use:-
   (a) 'AND₁' to signal the logical relationship of intersection (or union) of two parts of one
       (corresponding to the subscript) sentence. 'AND₁' is interpreted as a
       [sentence-part]-connecting 'and' 'within-sentence' use;
   (b) 'AND₂' to signal the logical relationship of conjunction of two (corresponding to the
       subscript) complete sentences. 'AND₂' is interpreted as a [full-sentence]-connecting 'and'
       'between sentence' use; and
   (c) a similar procedure with 'OR'.

183. Do not routinely use the format 'a means b, and includes c.'
   (a) If that concept is to be used, then draft in the format:-
       (i) a means b OR₂ c; AND₂
       (ii) a includes b AND₂ c.
   (b) This is an abbreviated way of saying:-
       (i) a means at least one, but possibly both, of b or c; AND₂
       (ii) a includes each of b AND₂ c, but there are other unspecified things which are
            included in the category of a.

184. Do not routinely use the format 'a means b, and includes c, but does not include d'.
   (a) If that concept is to be used, then draft in the format:-
       (i) a means b; AND₂
       (ii) c is an a; AND₂
       (iii) d is NOT an a.

185. Drafters must understand principles of law, the facts, and the structure of language.
   (a) The goal is clarity, precision, simplicity, and brevity.
   (b) Understanding logic should help to avoid syntactic ambiguity specifically, and
       vagueness generally.
   (c) If not a full understanding of formal logic, then at least a cursory awareness should be a
       tool of the drafter.
   (d) Complexities in language are often revealed through an understanding of logic.
   (e) Logic will better clarify the issues, and show the implications of making a particular
       choice - but logic will not supply criteria for making the selection between alternatives -
       whether semantic or syntactic.

186. Lawyers and drafters must understand each of the syntax forms:-
   (a) 'AND';
   (b) 'OR';
   (c) 'NOT';
(d) 'IF ... THEN ...'; AND
(e) 'IF AND ONLY IF ... THEN ...'.

187. An understanding of:-
(a) 'because'; AND
(b) 'unless'
is also helpful.

188. Documents would be easier to understand if legal rules were drafted in the form of an 'IF ... THEN ...' proposition, namely, 'IF condition-a is fulfilled, THEN result-b occurs'.

189. The awareness of the need to avoid syntactic ambiguities will:-
(a) increase the precision of communication between the drafter and the interpreter; AND
(b) make the drafter astute to draft documents so as not to contain syntactic ambiguities; AND
(c) alert the drafter against the inadvertent inclusion of syntactically ambiguous statements; AND
(d) serve as a convenient reminder which will help the drafter to be clear (when clarity is intended); AND
(e) ensure that any syntactic ambiguity incorporated in a document is intentional, not inadvertent; AND
(f) minimise the need for judicial legislation, insofar as that need arises from drafting ineptitude; AND
(g) enable the drafter to catalogue the permutations AND combinations of meanings which are possible alternatives to a syntactically ambiguous provision; AND
(h) assist the drafter to decide which of several competing interpretations of a syntactically ambiguous provision should be accepted as the most appropriate alternative.
Section 7(1) Firearms Act 1996

1. Section 7(1) Firearms Act 1996 provides:-

   A person must not possess or use a firearm unless the person is authorised to do so by a licence or a permit.

2. This may be interpreted to mean either of the following:-

   A1. A person MUST NOT
   (i) possess OR
   (ii) use
   a firearm unless the person is authorised to do so by a licence OR a permit ...

   A2. A person MUST
   (i) NOT possess OR
   (ii) use
   a firearm unless the person is authorised to do so by a licence OR a permit ...

3. Interpretation A2 is a far-fetched (but yet logically possible) structural interpretation: the legislature is most unlikely to prohibit possession, but yet mandate use.

4. It would be perverse for the legislature to impose an unqualified prohibition on possession of a firearm, but yet to obligate use of a firearm when authorised by a licence or permit.

5. Banning use with possession (even when licensed), but yet allowing use without possession (even when licensed) is an irregular (even if possible) use of language.

6. The legislature's argument, presumably, is that the context makes it clear that each of 'not' and 'a firearm' refer to both 'possess' and 'use'.

7. Nevertheless the need for that argument is unnecessary if the drafter adopted the format in interpretation A1.

8. The intrinsic abnormality of interpretation A2 is shown by omitting the possession component from the subsection, and interpreting 'unless' as the single conditional, 'IF NOT ... THEN ...'.

   Section 7(1) Firearms Act 1966 would then provide:-

   A3. A person must use a firearm if the person is not authorised to do so by a licence or a permit ...

9. Although drafting in the format of interpretation A1 is the preferable (leaving aside the scope of 'unless') methodology, interpretation A2 could have been avoided as being a possible interpretation if the parliament had used the common grammatical format for the denial of two alternatives, that is: 'neither ... nor ...'.

10. However this format neither resolves the scope of interpretation of 'unless' nor determines whether a conditional statement or a bi-conditional statement is intended.

11. Section 7(1) of the Act would then have been drafted as follows:-

   A person must neither possess nor use a firearm unless the person is authorised to do so by a licence or a permit ...
12. This would be interpreted to mean the following:—

A4. A person MUST
   (i) neither possess
   (ii) NOR use

   a firearm unless the person is authorised to do so by a licence OR a permit ...

13. The more interesting interpretation quandary is the scope of 'unless' in the subsection: is it to be interpreted as a conditional connector, or as a bi-conditional connector?

14. Statement A1 can be interpreted as one of the following:—

A5. A person MUST NOT
   1. possess OR
   2. use

   a firearm

   IF the person is NOT authorised to do so by

   3. a licence OR
   4. a permit ...

15. A5 is logically equivalent to A6:—

A6. IF

   [a] person is NOT authorised to do so by

   1. a licence OR
   2. a permit ...

   [THEN]

   the person MUST NOT

   3. possess OR
   4. use

   a firearm

16. In Professor Layman Allen's LEGAL RELATIONS language, A6 is expressed as A7:—

A7. IF 1. [a] person is NOT authorised to do so by

   2. a licence OR
   3. a permit ...

   THEN

   4. the person MUST NOT
   5. possess OR
   6. use

   a firearm

17. A7 is logically equivalent to the nonsensical A8:—

   ____________________________________________

   159 IF ... THEN is not material implication.

   160 Transportation.
A8. IF [a] person MUST
   1. possess OR
   2. use
      a firearm

   THEN
      [the] person is authorised to do so by
      3. a licence OR
      4. a permit ...

18. A7 is logically equivalent\textsuperscript{161} to A9:-

A9. IF 1. [a] person is NOT authorised to do so by a licence AND
      2. [a] person is NOT authorised to do so by a permit ...

      THEN
      3. the person MUST NOT possess a firearm AND
      4. the person MUST NOT use a firearm

19. An alternative series of possible interpretations (A10-A12) arises by construing 'unless' as a special variation of the bi-conditional, 'if and only if'.

20. A10. IF a person is NOT authorised to do so by
       1. a licence OR
       2. a permit ...

       THEN [the] person MUST NOT
       3. possess OR
       4. use
          a firearm AND

       IF a person is authorised to do so by
       1. a licence OR
       2. a permit ...

       THEN [the] person MUST
       3. possess OR
       4. use
          a firearm

21. From A10 may be deduced\textsuperscript{162} A11:-

A11. IF a person is authorised to do so by
       1. a licence OR
       2. a permit ...

       THEN [the] person MUST
       3. possess OR

\textsuperscript{161} De Morgan’s Rules.

\textsuperscript{162} Simplification.
22. In Professor Layman Allen's LEGAL RELATIONS language, A10 is expressed as A12:-

A12. IF a person is authorised to do so by
   1. a licence OR
   2. a permit ...

   THEN [the] person MUST
   3. possess OR
   4. use
      a firearm, BUT OTHERWISE, NOT
   4. use
      a firearm.
Contract for sale of land - New South Wales

1. Since the 1996 edition of the standard contract for sale of land in New South Wales was issued by The Law Society of New South Wales and Real Estate Institute of New South Wales, clause 18.1 has provided as follows:-

   *This clause applies only if the vendor gives the purchaser possession of the property before completion.*

2. I was a member of Property Law Committee of the Society during 1999, and also a member of its Contract for Sale of Land Review Committee. The committee was to recommend changes to the 1996 edition of the standard contract for sale of land in New South Wales.

3. Only one of my recommended changes was adopted in the 2000 edition of the standard contract for sale of land in New South Wales.

4. I submitted that:
   
   (a) clause 18.1 was defectively drafted; and
   
   (b) the text is the reverse of the presumed intention.\(^{163}\)

5. My submission was rejected.

7. The error reveals the difficulties in attempting to educate lawyers in drafting, and their resistance to change.\(^{164}\)

**Clause 18.1**

   *This clause applies only if the vendor gives the purchaser possession of the property before completion.*

8. Presumably what was intended was to state an equivalence between the:

   (a) giving of possession; AND

   (b) application of clause 18.

9. The drafter has, presumably for emphasis, used "only" incorrectly. This results in a reversal of the assumed intention.

10. The format of clause 18.1 is:

    *b, only if a.*

11. *b if a* is usually interpreted to mean:

    *IF a, THEN b.*

    *b if a* states that *a* is a sufficient condition for *b.*

---

\(^{163}\) Letter dated 20 November 1999 from Paul Conway to The Law Society of New South Wales.

\(^{164}\) The members of the committee were Dennis Bluth, Professor Peter Butt, Tony Cahill, Peter Underwood, Neville Moses, and Paul Conway. The Society's responsible legal officer, Jim Anderson, attended meetings of the committee.
14. $b$, only if $a$ is usually interpreted to mean:

IF $b$, THEN $a$

$b$, only if $a$ states that $a$ is a necessary condition for $b$.

12. The distinction between:

(a) $b$ if $a$; AND
(b) $b$, only if $a$

becomes apparent by understanding the interpretation of "$b$ if and only if $a$".

13. "$b$ if and only if $a$" is understood in the manner set out in paragraphs 160 -170.

is logically equivalent to:

14. "$b$ if $a'$ AND $b$ only if $a$".

15. Interpretation 14 is logically equivalent to:

16. "if $a$ then $b$" AND "if $b$ then $a$".

17. Clause 18.1 is logically equivalent to:

18. "IF this clause applies, THEN the vendor gives the purchaser possession of the property before completion."

19. Clause 18.1 is NOT logically equivalent to:

20. "IF the vendor gives the purchaser possession of the property before completion, THEN this clause applies."

21. Presumably the drafter intended to state:

22. "IF AND ONLY IF the vendor gives possession of the property to the purchaser before completion, THEN clause 18 applies".
